No problem. I'll have a hard copy to you next week.

Hi Rob,

I worked from home yesterday, so I got the revisions today. Looks good. I talked to Randy and he said to ask you to send a hard copy over so that I can send it to the owner. Can you when you get the chance?

Sounds good on the groundwater.

Thanks!

Megan

Hi Megan,

I had a relaxing Christmas and New Years--hope you had the same!

The revision was sent over to EPA today (sent through Roy Crossland). Let me know if there are any other changes.

I read through some of the old Standard Precision documents that you were able to find for me. There have been several groundwater investigations on and downgradient of the Standard Precision property. I have some ideas for our groundwater investigation. I'll get these ideas together and get with you soon.

Rob

Hi Rob,

The revisions and cd are fine. Hope you had a good Christmas!

Megan

Megan,

I've made these revisions. I've also edited some of the figures to show the approximate location of the sump. Do you prefer to receive just the revised text, RSE Form, figures, and new cd? Or would you rather have a complete new hard copy (with all appendices) and cd? It's no problem either way.

Thanks,  
Rob

Hi Rob,

I looked through the report and had a couple comments (sorry it took so long, I had a couple questions I had to ask Randy).

- There wasn't any reference to the tank under the concrete that will most likely need to be removed. I'll send you pictures that the owner of the building gave us, I don't know if you have them or not.

- Also, on page 2 of the SUPR RSE and Removal Preliminary Assessment it states that a PRP has been identified. There is currently a PRP search going on, but there has not been a PRP identified to date.

Thanks, Megan

Sounds good.

I've been a bit behind on getting the groundwater investigation QAPPs for Standard Precision and LaRay, but I have them going through our quality review right now...

Hi Rob,

I just wanted to let you know that I got the report. Sorry...I was out last week. I will look through it today.

Thanks!

Subject: Standard Precision

Hi Megan,

The Standard Precision report was delivered to EPA today (through Roy Crossland). I would have also emailed it to you, but it's a 30 MB file with the figures.

Have a good weekend,  
Rob
